

12-core fiber optic cold splice with three-year warranty

AI Overview

A 12-core fiber optic cold splice closure provides secure fiber connections with durable protection and can come with a three-year warranty.

Product Overview

A 12-core fiber optic cold splice closure is designed to store and protect fiber optic cables and splices, allowing for reliable connections between incoming and outgoing fibers. Cold splice technology enables the fibers to be connected without heat, using mechanical or adhesive methods, which reduces installation complexity and risk of thermal damage to the fibers (WebPages).

Key Features

Capacity: Supports 12-core fiber cables, with some closures expandable up to 72 or more cores for future scalability (WebPages).

Material: Made from high-density reinforced plastics or PP, offering corrosion resistance, mechanical strength, and lightweight design (WebPages).

Sealing and Protection: IP65 or IP68 rated closures provide excellent protection against dust, water, and environmental hazards, ensuring long-term reliability (WebPages).

Splice Tray: Includes trays for organizing fibers and splice protectors, allowing easy looping and management of excess fiber (WebPages).

Installation Types: Suitable for aerial, underground, duct, manhole, or pole installations (WebPages).

Warranty and Reliability

Many suppliers offer a three-year warranty for 12-core fiber optic cold splice closures, covering defects in materials and workmanship. Some manufacturers provide extended maintenance or lifetime support options, ensuring long-term performance (WebPages).

Additional Considerations

Customization: OEM options are available, including custom logos or labels (WebPages).

Ease of Use: Cold splice closures are designed for convenient construction and re-opening, making maintenance and fiber reconfiguration straightforward (WebPages).

Accessories: Full sets may include grounding wires, col...
