

24-core terminal box for the final general

AI Overview

A 24-core terminal box is a compact, versatile fiber optic distribution unit designed for FTTX/FTTH networks, supporting up to 24 users with splicing, splitting, and cable management capabilities.

Overview A 24-core fiber optic terminal box serves as the termination point where feeder cables connect to drop cables in FTTX networks. It integrates fiber splicing, splitting, distribution, storage, and cable connection in a single protective enclosure, making it suitable for both indoor and outdoor installations.

Key Features

- Capacity:** Supports up to 24 fibers, accommodating SC or LC adapters, and can integrate mini PLC splitters (1:8 SC or 1:16 LC) for network expansion.
- Protection:** High-quality engineering plastic construction with IP55-IP67 protection, ensuring resistance to rain, dust, and environmental stress for outdoor use.
- Installation:** Can be wall-mounted or pole-mounted, with multiple cable entry and exit ports for easy cable routing without cutting.
- Cable Management:** Designed for efficient splicing and storage, allowing secure organization of pigtails and excess fiber, with the ability to connect/reconnect adapters multiple times.
- User Support:** Typically meets the requirements of 16-24 users, depending on network configuration and splitter integration.

Applications FTTH and FTTX deployments for residential or commercial buildings. Optical LAN, WAN, and CATV networks. Broadband high-bit rate data transmission. Active device terminations and optical signal distribution. Testing and maintenance of fiber optic networks.

Advantages Compact and durable design suitable for harsh environments. Simplifies fiber network management by combining multiple functions in one box. Flexible installation options and high adaptability to different network topologies. Supports integration with splitters and adapters for scalable network expansion.

In summary, a 24-core terminal box is an essential component for fiber optic networks, providing a secure, organized, and scalable solution for connecting multiple users while protecting fibers from environ...
