

422 to fiber optic single-mode single-core

Overview

The DL422 is a RS422 4-wire to singlemode fiber optic converter for point-to-point connections. For adapter you can make the choice between ST, SC, E2000 or SC-BIDI. BIDI technology means that you need only one fiber for transmitting and receiving of the data. The fiber optic systems DL422 connect. Moxa's industrial-grade serial-to-fiber optic converters can convert RS-232/422/485 to optical fiber, which provides users with an easy and reliable way to communicate with their serial devices.

RS-232/422/485 to single-mode optical fiber media converter with fiber ring support and SC connector, 0. The 20km SER-FIBER-SM-ST OR SER-FIBER-SM-SC is a industrial grade bi-directional externally powered multi-functional RS232/RS485/RS422 to Single Mode Fiber Optic Converter which converts either full-duplex RS232, half-duplex RS-485 or full-duplex RS422 to a single mode SC or ST connector type fiber.

The SC201 is a converter that facilitates the connection of a remote terminal unit (RTU) with a HOST or SCADA controller by converting RS-232/485/422 signals to 100M Single Mode Fiber. It has flexible port options, allowing the user to mix and match RS-232, RS-485, or RS-422 ports, and supports 2. The I-2542-A/I-2542-B series of single-Strand fiber Converters supports Wavelength Division Multiplexing (WDM) technology that allows two independent data communication channels to transmit and receive over one standard, single mode and fiber optic line.
