

5-port TP-Link Switch

AI Overview

The TP-Link TL-SG105 is a 5-port Gigabit unmanaged switch ideal for expanding home or small office networks with plug-and-play simplicity.

Key Features

- Ports and Speed:** The TL-SG105 provides 5 Gigabit Ethernet ports (10/100/1000 Mbps), allowing fast transfer of large files and smooth multimedia streaming.
- Plug-and-Play:** No configuration is required; simply connect devices and the switch works immediately.
- Auto-Negotiation & Auto-MDI/MDIX:** Each port automatically detects the optimal speed and eliminates the need for crossover cables.
- Energy Efficiency:** The switch adjusts power consumption based on link status and cable length, saving up to 65% energy.
- Durable Design:** Fanless metal casing ensures quiet operation and long-lasting reliability.
- Quality of Service (QoS):** Supports 802.1p and DSCP QoS for smooth handling of latency-sensitive traffic like voice and video.
- Multicast Optimization:** IGMP Snooping improves delivery of IPTV and other multicast streams.

Variants

- TL-SG105:** Standard unmanaged switch, ideal for basic network expansion at home or office.
- TL-SG105PE:** Easy Smart Managed version with PoE support on four ports, allowing both data and power over a single cable for devices like IP cameras or access points.

Use Cases

- Expanding Ethernet ports for desktops, laptops, or network-attached storage.
- Supporting high-bandwidth applications such as multimedia editing, IPTV, or CAD file transfers.
- Small office or home office setups requiring reliable wired connections without complex configuration.
- Powering PoE devices with the TL-SG105PE variant.

Physical and Practical Details

- Compact Size:** Approximately 19.6 x 12.8 x 10.7 cm, lightweight at 0.43 kg.
- Fanless Operation:** Silent performance suitable for desktop placement.
- Warranty:** Typically comes with a 1-year manufacturer guarantee.

The TP-Link 5-port switches are cost-effective, energy-efficient, and easy to deploy, making them a practical choice for users needing to expand their wired network quickly and reliably.
