

Andorra 5-pin laser diode socket

Overview

These laser diode sockets are ideal for OEM-type implementations and are compatible with our selection of Ø3.6 mm, Ø9 mm, and TO-5 laser diode packages. All of these sockets are available individually or in packs of 5, with select models also available in. Thorlabs offers a versatile range of accessories for convenient integration of laser diodes into functional systems. Mouser offers inventory, pricing, & datasheets for Laser Diode Socket IC & Component Sockets. We also provide cable-equipped sockets designed for FCD. Most of the laser diode sockets required by optical active component manufacturers have a single specification, short. Laser Diodes and Modules are semiconductor devices that can emit a beam of high intensity focused radiation, typically in the infrared, visible or ultraviolet wavelength ranges of the electromagnetic spectrum, coherently (light waves of the same wavelength, phase and direction).
