

Bahrain CIF Price for SFP Optical Module 800G

AI Overview

The CIF price for an 800G optical module SFP in Bahrain typically ranges from \$1,000 to \$1,900 per unit, depending on module type, vendor, and volume. Price Overview For 800G optical modules, current market pricing varies by type and vendor: 800G QSFP-DD-DR8: \$1,000–\$1,300 per unit for bulk orders (1000+ units) from third-party vendors, with OEM modules commanding a 30–50% premium. 800G OSFP-DR8: \$1,100–\$1,400 per unit for large-volume purchases. 800G OSFP-FR4 (longer reach): \$1,500–\$1,900 per unit. Linear Pluggable Optics (LPO): \$700–\$900 per unit, lower cost due to no DSP. Third-party modules generally offer 20–40% savings compared to OEMs, though early-generation 800G modules may cost 40–60% more due to technology maturity. Volume discounts are common: 10–20% for orders over 1000 units, and 20–30% for orders over 5000 units. Factors Affecting CIF Pricing Vendor Tier: OEM modules (Cisco, Arista) are more expensive than third-party compatible modules. Shipping and Insurance: CIF includes freight and insurance to Bahrain ports, which can add 5–10% to the base price depending on shipping method. Customization: Special wavelengths, extended temperature ranges, or testing can increase costs by 15–30%. Local Market: Bahrain has active SFP/module buyers such as Y K ALMOAYYED SONS and M SSTARWELL AUTOMATION WLL, which may influence local pricing and availability. Practical Guidance For short-reach intra-data center connections, DR8 modules are cost-effective. For longer reach or critical workloads, FR4 or OEM modules may be preferred despite higher costs. Engaging local buyers or distributors in Bahrain can help reduce lead times and shipping costs. In summary, for budgeting purposes, expect CIF prices in Bahrain for 800G SFP modules to fall roughly between \$1,000 and \$1,900 per unit, with exact pricing influ...
