

Cable tray angle steel bracket styles

AI Overview

Angle steel brackets are a durable and versatile solution for supporting cable trays, offering strong load-bearing capacity and compatibility with various mounting configurations. Material and Construction Angle steel brackets for cable trays are typically made from high-quality steel, including low-carbon steel, pre-galvanized steel, or hot-dip galvanized steel for enhanced corrosion resistance and long-term durability. Stainless steel options (A316/A4) are also available for highly corrosive environments. The steel is often pre-drilled or slotted to allow flexible attachment points and easy installation. Types of Angle Brackets Stand-Off Brackets: Used to mount cable trays at a specific distance from walls or surfaces, available in widths from 50mm to 300mm. G Hanger Support Brackets: Designed for overhead support of cable trays, trunking, or baskets, typically in 100mm and 150mm sizes. Trapeze Support Brackets: Pre-assembled for quick installation, suitable for supporting multiple cable trays with various drop lengths. Heavy-Duty Angle Brackets: Longer leg designs provide tool clearance and can attach to concrete, steel, or composite decking. Installation and Compatibility Angle steel brackets can be mounted on walls, ceilings, floors, or steel structures using anchors, bolts, or concrete nail guns. They are compatible with wire mesh trays, ladder trays, and solid-bottom trays, and can support horizontal, vertical, or sloped routing configurations. Brackets are designed to meet industry safety and load-bearing standards, ensuring secure cable management. Finishes and Corrosion Protection Pre-Galvanized (PG): Provides basic corrosion protection for indoor or mild environments. Hot-Dip Galvanized (HDG): Offers superior corrosion resistance for outdoor or industrial applications. Custom Coatings: Available upon request for specialized environments. Practical Considerations When selecting angle steel brackets for cable trays, consider: Load capacity: Ensure the bracket can support the weight of the cable tray and cables. Tr...
