

Cable tray ramp price

AI Overview

Cable tray ramps are available in standard widths from 50mm to 600mm, heights from 50mm to 120mm, and lengths typically 2.5m to 3m, with prices ranging from \$50 to \$300 per section depending on material and load class.

Standard Dimensions

Cable tray ramps, like straight trays, follow standardized dimensions to ensure proper cable support and compliance with NEC, NEMA, and IEC standards. Key dimensions include:

- Width:** Nominal inside widths typically range from 50mm to 600mm, with outside dimensions slightly larger due to side rail thickness ().
- Height/Depth:** Side rail heights usually range from 50mm to 120mm, controlling vertical stacking capacity and heat dissipation ().
- Length:** Standard tray sections are commonly 2.5m or 3m long, allowing modular installation and easy connection to straight runs or other fittings ().
- Material Thickness:** Mild steel trays often have thicknesses from 1.2mm to 1.5mm, with options for epoxy powder coating, hot-dip galvanization, or bare steel (). Ramps are designed to provide a gradual incline for cable transitions between different elevations, typically at angles of 15° to 30°, depending on the installation requirements ().

Material and Load Considerations

- Steel (Mild or Galvanized):** Most common, suitable for heavy-duty industrial applications.
- Aluminum:** Lightweight, corrosion-resistant, ideal for indoor or outdoor use.
- Fiberglass/FRP:** Non-conductive, corrosion-resistant, used in chemical or wet environments.

Load class and support span affect both the tray selection and cost, with higher load ratings requiring thicker materials or reinforced designs ().

Pricing

Cable tray ramp prices vary based on material, width, height, and load class:

- Small steel ramps (50–150mm width):** Approximately \$50–\$100 per 2.5m section.
- Medium ramps (200–400mm width):** Around \$100–\$200 per section.
- Large or heavy-duty ramps (450–600mm width, reinforced steel or aluminum):** Can cost \$200–\$300 per section ().

Additional costs may include fittings such as elbows, red...
