

Cable type for conduit cable puller

Overview

For standard electrical installations in buildings, a corrugated PVC conduit PCV is most commonly used, which is flexible, resistant to mechanical damage, and facilitates cable pulling. A cable puller is a mechanical or powered device that draws electrical conductors through conduit or cable tray under controlled tension. The selection of an appropriate cable pulling method depends heavily on factors such as cable type, length of the run. The selection of the appropriate conduit depends on the type of installation and the environment in which the cable will be routed. 30464K 4-Inch Flexible Cable Conduit Mandrel, Cable Puller Flexible Mandrel B. In this guide, we review top products designed to meet various electrical wire pulling needs—including ropes with high tensile strength, low-stretch tapes, fiberglass rods, and fish tapes.
