

Common Models of Distribution Boxes

AI Overview

Distribution boxes come in various models, including main, sub, single-phase, three-phase, indoor, outdoor, and specialized types for lighting or control applications.

Primary Types by Function

- Main Distribution Box (MDB):** Receives power from the main supply and distributes it to multiple circuits. Common in homes, offices, and factories, often equipped with circuit breakers and safety devices for overload protection.
- Sub Distribution Box (SDB):** Receives power from the main box and distributes it to specific areas or floors, reducing long cable runs and improving system flexibility.
- Industrial Distribution Box:** Designed for harsh environments, capable of handling high loads, dust, moisture, and vibration, often with reinforced casings.

Types by Phase and Load

- Single-Phase Distribution Boxes:** Suitable for residential properties and small commercial loads, powering lights, fans, and small appliances.
- Three-Phase Distribution Boxes:** Used in industrial and large commercial facilities requiring higher power capacity, supporting heavy machinery and large equipment.

Types by Installation and Environment

- Indoor Distribution Boxes:** Installed in protected environments like homes, offices, or utility rooms, where exposure to weather is minimal.
- Outdoor Distribution Boxes:** Built for exposed environments, with strong enclosures and appropriate IP ratings to resist rain, dust, and temperature changes.
- Surface-Mounted Boxes:** Mounted directly on walls, ideal for retrofits and industrial settings.
- Flush-Mounted Boxes:** Embedded into walls for a clean, aesthetic appearance, commonly used in residential and commercial buildings.
- Pole-Mounted Boxes:** Designed for outdoor utility applications, such as street lighting.

Specialized Distribution Boxes

- Lighting Distribution Boxes:** Dedicated to managing lighting circuits with protective devices.
- Power Distribution Boxes:** Support sockets, equipment, and heavy machinery.
- Control Distribution Boxes:** Integrate control components like relays, contactors, and timers for automation or specialized control systems.
