

Construction Site Small Distribution Box

Overview

An XS construction distribution box is a compact, portable electrical box designed for temporary power supply to equipment on construction sites, during renovations, or installation work. Its tasks are simple: to enable efficient work in changing conditions. Discover more about the small businesses partnering with Amazon and Amazon's commitment to empowering them. Contains at least 50% recycled. BLOCK Series distribution assemblies are made of thermoplastic material DOMINO and feature the same versatility and performance as the DOMINO Series. The pre-wired versions can be used on construction. This sheet metal part commissioned by a US customer has a high degree of customization. Divide the time it actually works by the hours it could work. When you guess your power needs, remember to add costs like fuel, repairs, and training.

Article Content
