

Construction site prefabricated power distribution box with electricity meter

Overview

Equipped with a multifunctional electricity meter, leakage circuit breaker, and a maximum rated current of 20A branch circuit breaker; **SAFE AND RELIABLE:** This power outlet box comes with 4 NEMA 5-20 IP44 waterproof sockets. **YBW Prefabricated Substation** is a compact power distribution device based on European technology, featuring “factory pre-installed integration + outdoor adaptability. It integrates high-voltage switches, power transformers, low-voltage power. Using the types of distributor described in the equipment standards, it is possible to set up a power supply solution from the feed-in point from the public grid all the way to the consumer connection tailored to all site requirements. Design and versions Through their solid construction and the. **60A HIGH CURRENT POWER SUPPLY BOX:**The input voltage of the power box is 110V, and Maximum tolerable load current 60A. Prefabricated assemblies integrate multiple pieces of electrical equipment into an enclosure or skid and can be designed for stand-alone construction.
