

Cost of galvanized metal cable trays in Canada

AI Overview

Galvanized steel cable trays in Canada typically cost between CAD \$10 and \$30 per meter, depending on type, size, and coating. Price Range and Factors The cost of galvanized metal cable trays varies based on several factors:

Material and Coating: Hot-dip galvanized (HDG) steel offers superior corrosion resistance and durability, costing more than pre-galvanized steel, which is cheaper but less durable in corrosive environments.

Tray Type: Ladder trays, which support heavier cables, are more expensive than perforated or wire mesh trays, which are lighter and suitable for smaller loads.

Size and Dimensions: Wider or deeper trays designed to carry more cables increase the per-meter cost.

Supplier and Volume: Bulk orders or project-based purchases can reduce the per-meter price, while small quantities may be at the higher end of the range.

Additional Costs: Shipping, installation, fittings, and accessories can add to the total project cost.

Typical Canadian Suppliers ABB Electrification Canada offers T&B galvanized metallic cable tray systems suitable for evolving wiring needs. Nedco provides a range of cable trays, fittings, and accessories for contractors and project managers. Cabletiesandmore offers wire basket and electro-zinc coated steel trays with options for corrosion resistance and custom sizing.

Cost-Saving Tips Opting for perforated trays instead of ladder trays can save up to 15% if heavy load support is not required. Ordering in bulk or negotiating with suppliers can lower per-meter costs. Consider pre-galvanized trays for indoor or less corrosive environments to reduce upfront costs.

In summary, for a standard galvanized steel cable tray in Canada, expect CAD \$10–\$30 per meter, with the final cost influenced by tray type, coating, size, and additional project requirements.
