

Distribution box HA and HT

AI Overview

HA and HT distribution boxes are waterproof, dustproof electrical enclosures made from ABS and PC materials, designed for indoor and outdoor power distribution with IP65 protection.

Overview and Materials Both HA and HT series distribution boxes are constructed with high-strength ABS bodies and PC transparent covers, providing excellent impact resistance, UV protection, chemical resistance, and long-term durability. These materials ensure the boxes are suitable for harsh environments, including outdoor, industrial, and commercial settings. The transparent cover allows easy inspection of internal components without opening the box.

Protection and Standards Protection Grade: IP65, ensuring complete protection against dust and water splashes. Certifications: CE and ROHS compliant, meeting international safety and environmental standards.

Applications HA Series: Designed for applications requiring frequent access and maintenance, such as residential buildings, commercial facilities, and industrial control systems. It is suitable for locations exposed to rain, dust, moisture, or sunlight. HT Series: An economical option for basic residential, office, and light industrial wiring, providing reliable protection with a compact structure. Ideal for home distribution systems, office wiring, and light industrial installations.

General Uses: Electrical, communication, fire-fighting apparatus, petrochemical, railway, building, mine, hotel, ship, wastewater treatment, and environmental equipment.

Internal Configuration and Installation Internal Features: DIN rails for circuit breakers, earth bars, and neutral bars for cable connections. HA series may include guide rail support plates for flexible wiring. Installation: Can be wall-mounted or fixed on flat surfaces using screws or nails. Cable entry points are provided with knock-out plates for easy wiring.

Ease of Maintenance: HA series features press-to-open covers with self-locking hinges for convenient access.
