

Does an explosion-proof distribution box have sockets What is the price

AI Overview

Portable explosion-proof socket distribution boxes typically range from \$150 to \$600 per unit, depending on capacity, features, and supplier. Price Overview The cost of a portable explosion-proof distribution box varies based on several factors:

- Number of sockets: Common models include 12-way or multi-socket configurations, with higher socket counts generally increasing the price.
- Material and durability: Boxes made from ABS or other reinforced materials designed for industrial use may cost more.
- Features: Overload protection, short-circuit protection, ground fault protection, and rainproof or IP-rated enclosures can affect pricing.
- Supplier and order volume: Wholesale orders or bulk purchases often reduce the per-unit cost, while custom or OEM-branded units may be more expensive.

Typical Price Ranges

- Small to medium portable boxes (6-12 sockets): Approximately \$150-\$300 per unit on platforms like Amazon and AliExpress.
- Larger or industrial-grade units with advanced features: Around \$300-\$600 per unit, especially for custom or high-capacity models available on Alibaba.

Additional Considerations

- Shipping and import fees: Prices may vary depending on location and shipping method.
- Customization: OEM branding, modular designs, or specific IP ratings can increase costs.
- Supplier reliability: Check reviews and product quality, as some users report minor defects in ABS enclosures, which may affect long-term durability.

For precise pricing, it is recommended to contact suppliers directly for quotes based on your required specifications, quantity, and delivery location.
