

Does optical fiber cable belong to tangible movable property

Overview

Typically, fibre optic cables are classified as tangible property used in telecommunications. This classification is crucial as it determines the applicable depreciation scheme under IRS rules. On January 25, 2024, the New York State Supreme Court Appellate Division ruled against the taxpayer, finding that the taxpayer's equipment did not qualify for exclusion from real property tax. Taxpayer, SLIC Network Solutions, provides internet, telephone and cable television services via. Petitioner's charges for its Cross Connect Service also do not constitute charges for the sale or use of the cables as tangible personal property, because the cables as installed constitute a capital improvement to real property, the sales, lease, or use of which is not subject to sales tax. Movable property, also known as personal property, refers to any tangible or intangible asset that can be moved or transferred from one place to another, as opposed to immovable property like land or buildings. In legal terms, movable property encompasses a wide range of items, including furniture. An optical fiber, or optical fibre, is a flexible glass or plastic fiber that can transmit light from one end to the other. The provision by Taxpayer of the Tenant Services does not give rise to impermissible tenant service income, and will not cause any portion.
