

Dokvm switcher

Overview

Desktop KVM switches are compact devices that allow a user to access two, four, eight, or 16 computers from a single user console eliminating the need for extra peripherals, while providing faster access to critical applications. The ClimatePartner certified product label confirms that a product meets the requirements for the five steps in climate action including calculating carbon footprints, setting reduction targets, implementing reductions, financing climate projects and communicating transparently to continuously. A KVM (keyboard, video, mouse) matrix is a hardware system that allows multiple computers to be controlled from a large number of workplaces via a central module. Usually, a KVM matrix consists of a combination of a central matrix switch and matrix-compatible KVM extenders. It combines the. With iDock C10, you can easily share a 12-in-1 docking station between a laptop and a desktop PC. Choose a KVM switch that suits your application with DisplayPort. Control multiple computers with one keyboard, mouse, and monitor using our recommended KVM switches, with setup guides, troubleshooting tips, and security considerations for work and home office environments.
