AI Overview

Exhibition distribution boxes provide flexible, safe, and customizable power solutions for trade shows, conventions, and event spaces. Overview Electrical distribution boxes for exhibitions are portable or modular units designed to supply power safely and efficiently to temporary setups such as trade show booths, convention centers, and event stages. They ensure reliable electricity distribution for lighting, audio/video equipment, and other utilities while allowing quick installation and dismantling. Key Features Flexibility and Mobility: Many boxes, like Wieland's WIV series, offer pluggable systems for easy extension and rapid assembly, suitable for changing locations. Safety and Compliance: These boxes often include residual current devices, miniature circuit breakers, and master switches, complying with standards such as IEC 61439 and IEC 61535. Customization: Options include different connector systems (e.g., gesis® MINI, gesis® CLASSIC, RST® CLASSIC) and power ratings (20 kVA or 40 kVA), allowing adaptation to specific energy requirements. Compact and Discreet Designs: Products like CUBE Technologies' COMPACT XS and MINI CUBE models are designed to fit small stands, reduce cabling, and integrate seamlessly into modular exhibition structures. Data and Monitoring: Some distribution boxes can include multifunction meters to log energy consumption and monitor electrical data. Indoor and Outdoor Use: Certain models are rated for higher IP protection for outdoor or wet environments, while standard versions are suitable for dry indoor areas. Applications Trade Shows and Conventions: Provide power to multiple booths and exhibition stands with minimal floor space usage. Event Centers and Concerts: Support lighting, sound systems, and temporary installations with reliable, high-capacity power distribution. Convention Centers: Floor boxes, such as Legrand's Convention Center Series, integrate power, data, and other utilities directly into the show floor, offering high amperage ratings and flexible layouts.
