

Extending Mobile Fiber Optic Cables

Overview

There are two ways of extending an optical fiber: By fiber splicing. Extending the fiber may be necessary when relocating equipment, a workstation, or a subscriber terminal. This raises the question: how do you connect or extend an optical cable, and is it possible to do so in “in-house” conditions?

There are two ways of extending an optical fiber: By fiber. If you get your hands on a Pre-terminated Fiber Optic Assembly and a couple of Media Converters, you're only a few steps away from extending your small wifi network more than 250 feet. The video recommends using a pre-terminated fiber. Yes, fibre optic cables can be extended by using splice closures or optical connectors to join multiple cables together. This allows for longer distances to be covered without loss of signal quality. Fiber optic. Fiber optical cable provides great advantages rather than copper cat5e/cat6 cable.
