

FC-FC Fiber Optic Adapter

AI Overview

An FC to FC fiber optic adapter is used to connect two FC connectors, allowing for low-loss communication between fiber optic cables. Here are some options:

- F-MA-FC-FC Optical Fiber Mating Adapter:** This adapter connects two FC/PC or FC/APC fibers and is suitable for both single-mode and multi-mode fibers.
- FC Connector Adapter (FC-FC):** Designed to extend cable length by joining two fiber optic patch cords together with low coupling loss.
- FC to FC Fiber Coupler:** A metal female flange adapter that connects fiber optic cables, suitable for server racks and optical distribution frames.

.These adapters are essential for maintaining signal integrity in fiber optic networks.
