

Fiber Optic Cable Identification Label Manufacturer

AI Overview

Leading manufacturers of fiber optic cable identification labels include Multilink, Panduit, All-Labels, Brady, and Fosco, offering durable, customizable, and industry-compliant solutions.

Key Manufacturers and Their Offerings

- 1. Multilink, Inc.** Multilink provides MULTITAG™ cable identification tags designed for easy installation without special tools or adhesives. Their tags are UV-stabilized for outdoor durability, available in multiple colors for cable segregation, and feature customizable engravings. They offer sizes such as 0.5" x 8", 1" x 8", and 2" x 8", with a 20-year warranty on the plastic body and a lifetime warranty on the engraving, making them suitable for long-term field applications in telecommunications networks.
- 2. Panduit** Panduit's LabelCore™ system uses sleeves and vinyl labels to provide a large, easy-to-read labeling surface. The system is color-coded for different fiber types (e.g., Yellow for 2mm simplex, Orange for 3mm simplex) and follows the TIA/EIA-606-A standard for unified telecom/datacom labeling. Self-laminating labels protect the printed information, and sleeves fit securely even in vertical cabling setups.
- 3. All-Labels** A UK-based manufacturer, All-Labels specializes in custom fiber optic tags and labels for high-density environments like data centers and telecom hubs. They offer bespoke designs, custom printing with numbering, color coding, or company branding, and materials engineered to withstand heat, high traffic, and long-term use. Their product range includes self-laminating wraps, flag-style tags, and rigid markers.
- 4. Brady** Brady provides a wide range of wire and cable labels, including heat-shrink sleeves, laser-markable labels, and outdoor-durable options. Their labels are suitable for harsh environments, chemical exposure, and high-temperature applications. Brady also offers printers and software for custom label creation, supp...
