

Fiber Optic Communication HP

Overview

Hewlett-Packard's discrete fiber-optic components have been used to construct high-performance optical transmitters and receivers for numerous cost-sensitive LAN, telecom, industrial, and proprietary point-to-point data communication applications. ("HP") is a full turnkey OSP/ISP contractor founded in 1998. We strive for excellence in everything we do. We stay current with the latest and greatest products and training to incorporate new technologies as they develop, thereby responding quickly to our customers' demands. Advent of Laser in 1960's, but didn't work for optical communication due to attenuation problem!. For long range communication system the loss limit was set to 20 dB/Km (was ~ 1000 db/Km or higher at that time!)., the optical losses were not due to. Anything with a laser has undeniable hacker appeal, even if the laser's task is as pedestrian as sending data over a fiber optic cable. Fiber optics can provide solutions to many data transmission system design problems. Following a brief review of the merits, as well as the limitations, of fiber optics. Not only does HP Communications make this happen as a full-service OSP/ISP contractor, but it goes above and beyond by fostering a company culture to build up men and women and create an extended family in the workplace. When using discrete fiber-optic components the.
