

Fiber Optic Patch Cord Customization Price

AI Overview

Custom fiber optic patch cords typically cost between \$30 and \$100 for setup, with the final price depending on length, fiber type, connectors, and testing requirements.

Pricing Overview

The cost of a custom fiber optic patch cord varies widely based on several factors:

- Setup Costs:** For OEM or ODM orders with custom logos or labels, setup fees generally range from \$30 to \$100, though bulk orders can reduce this cost.
- Fiber Type:** Single-mode, multimode, or polarization-maintaining fibers influence pricing, with specialty fibers often costing more.
- Connector Types:** Common connectors include LC, SC, FC, ST, MU, and MTRJ. High-precision or high-power connectors may increase costs.
- Cable Length and Configuration:** Longer cables or multi-fiber assemblies (up to 144 fibers) are more expensive. Simplex, duplex, and multi-fiber options also affect pricing.
- Testing and Certification:** Individually tested cords with insertion loss (IL), return loss (RL), and end-face inspection reports add to the cost.
- Regional and Compliance Factors:** U.S. installations may require UL-listed or ETL-verified labeling and fire-rated cables, which can increase costs.
- Ordering and Lead Time**

Many suppliers, such as Thorlabs, FS, and Fiber Instrument Sales, offer custom configurators that allow you to select fiber type, connectors, length, and other specifications to get immediate pricing. Lead times vary depending on complexity:

- Standard custom cables** can often ship within 2-5 business days.
- Specialty cables** requiring longer epoxy curing or high-power connectors may take longer.

Practical Considerations

- Bulk Orders:** Ordering multiple cords reduces per-unit cost.
- Testing Requirements:** If your project requires detailed test reports for each cord, expect higher pricing.
- Customization Level:** More complex configurations, such as multi-fiber breakout cables or specialty connectors, increase cost.
