

Fiber-free wireless router

AI Overview

A fiber-free router is a router that connects to an existing fiber-optic ONT without requiring a built-in fiber modem, offering high-speed internet via LAN or Wi-Fi. What is a Fiber-Free Router? A fiber-free router is designed for households or offices where a fiber-optic connection is already terminated at an ONT (Optical Network Terminal). Unlike routers with integrated fiber modems, these devices do not directly handle the optical signal but instead connect via Ethernet to the ONT. This setup allows you to use advanced routers with high-speed Wi-Fi and multiple LAN ports without needing a dedicated fiber modem inside the router itself.

Key Features to Consider

- Wi-Fi Standards:** Modern fiber-free routers often support Wi-Fi 6 or Wi-Fi 7, providing faster speeds, lower latency, and better handling of multiple devices.
- LAN Ports:** Look for routers with multiple gigabit or 10-gigabit LAN ports to fully utilize fiber speeds. Some models support LAN aggregation for combined higher throughput.
- Tri-Band or Dual-Band Wi-Fi:** Routers with multiple frequency bands (2.4 GHz, 5 GHz, and sometimes 6 GHz) allow simultaneous connections and higher overall network performance.
- Advanced Features:** Many fiber-free routers include mesh networking, parental controls, media servers, and smart home integration.

Recommended Models

- FritzBox 4690:** Ideal for users with an existing fiber ONT. Offers 10G and 2.5G LAN ports and Wi-Fi 6 on 2.4 GHz and Wi-Fi 7 on 5 GHz for high-speed wireless performance.
- FritzBox 5690 Pro:** Supports Wi-Fi 7 with tri-band operation (2.4, 5, and 6 GHz) and Multi-Link Operation (MLO) for simultaneous multi-frequency connections, achieving theoretical speeds up to 11,530 Mbit/s on 6 GHz.
- Netgear RS700S:** Features a 2.6 GHz quad-core CPU, 2 GB RAM, 10G LAN/WAN ports, and four 1G LAN ports, optimized for gigabit and multi-gigabit fiber plans.

Advantages

- Flexibility:** Can be used with any fiber provider that supplies an ONT.
- Performance:** High-speed Wi-Fi and multiple LAN ports allow full utilization of fiber bandwidth.
- Future-Proofing:** Support f...
