

# Fiber splicing table for optical cable reels

## AI Overview

Fiber splicing tables provide a stable, ergonomic, and portable work surface for managing optical cable reels and performing precise splicing operations in the field or central office.

**Key Features of Fiber Splicing Tables**

**Work Surface and Size:** Most fiber splicing tables offer a spacious work area to accommodate splicing machines, cable reels, and tools. For example, U-TECK's Fiber Optic Splicing Workstation has a surface area of approximately 35-1/2" x 22-1/2" with a recessed area of 22" x 18" for secure cable handling and splicing equipment placement . AFL's Mobile Splicing Workstation provides a large, configurable surface with integrated cutting grooves and tool storage .

**Portability and Setup:** Many tables are designed to be lightweight and foldable for field use. Napco's CableTable is portable, with optional leg extensions for adjustable heights of 28", 29", or 36" . U-TECK tables can be freestanding, wall-mounted, or attached to aerial cable strands using adjustable stand-offs . AFL's workstation doubles as a dolly, scaffold, or creeper for versatile field deployment .

**Cable Management:** Effective cable management is critical for splicing operations. Tables often include molded slots for fiber splicing sleeves, cable brackets, and stand-offs to keep optical fibers organized and prevent tangling . U-TECK's workstation features a Cable Management Bracket and accessory slots for aerial strand cables, ensuring the table remains stable while handling reels .

**Accessory Integration:** Many splicing tables come with integrated or attachable accessories such as LED lights, magnifiers, tablet holders, splice tray holders, and tool pouches . AFL's workstation includes a built-in protractor, drill hole guide, and power strip for enhanced productivity . Napco's CableTable supports additional accessories like lamps, clamps, and tote bags .

**Ergonomics and Stability:** Adjustable height and sturdy construction are common features to reduce operator fatigue. U-TECK tables stand at 31-1/2" tall and can be leveled when mounted on walls or aerial strands . AFL's reversible top p...
