

G 654 Drop Fiber Optic Cable OEM

Overview

G.654 describes the geometrical, mechanical and transmission attributes of a single-mode optical fibre and cable which has the zero-dispersion wavelength around 1300 nm wavelength, and which is loss-minimized and cut-off wavelength shifted at around the 1550 nm. Recommendation ITU-T G. 654 was approved on 14 December 2006 by ITU-T Study Group 15 (2005-2008) under the ITU-T Recommendation A. The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications. E fibre: empowering ultra high-capacity long-haul transmission. Coherent optical technology and G. Sumitomo Electric. As a leading fiber optic manufacturer with 21 years of experience, GL FIBER specializes in producing high-performance G. It makes performance optimization in both C band (1530-1565nm) and L band (1565-1625nm). Thanks to its ultra-low loss and large effective area, it is increasingly deployed in backbone networks, submarine cable systems, and data center interconnection (DCI).
