

Greece Mobile Direct Burial Optical Cable Price Inquiry

AI Overview

Direct burial fiber optic cables in Greece typically range from €0.85 to €1.50 per meter for standard 24-fiber single-mode cables, with armored or high-fiber-count variants costing 40–80% more.

Pricing Overview

- Standard 24-count single-mode cables: €0.85–1.50 per meter at distributor level in 2026.
- Armored or high-fiber-count cables: Premium of 40–80% over standard designs, depending on fiber count and armoring type.
- Hybrid cables (optical fibers with copper conductors for 5G or smart-grid applications): Typically 8–12% of new installations, with higher unit costs due to integrated functionality.

Factors Affecting Price

- Fiber count: Medium-count (24–144 fibers) dominate backbone deployments; high-count (>144 fibers) are more expensive.
- Armoring and jacketing: Steel-tape or dielectric armoring increases durability for direct burial but adds cost.
- Water-blocking technology: Dry water-blocking designs are preferred for easier installation and lower environmental compliance costs.
- Supply constraints: Limited availability of high-grade HDPE and armoring materials can affect pricing.

Suppliers and Distributors in Greece

- Mouser Electronics Greece: Offers a wide selection of fiber optic cables with pricing and datasheets for various fiber counts and types.
- Local Greek suppliers: Companies listed on Kompass Greece provide wholesale, import, and installation services for fiber optic cables and telecommunication networks.
- Corning: Provides direct-buried outdoor cables suitable for trench or plow installation, including armored and gel-free designs.

Additional Considerations

- Prices above are cable-only and do not include installation, trenching, or splicing services.
- EU and Greek regulations, such as broadband subsidy programs, may influence procurement costs and availability.
- For precise quotes, contacting distributors directly is recommended, as bulk orders, fib...
