

H or trapezoidal cable tray

Overview

A trapezoidal cable tray is a cable tray composed of two longitudinal channels connected to a horizontal support crossbar. These trays have large space and good ventilation performance. Unlike conduit systems, cable trays allow cables to be laid in bundles, improving accessibility, heat. Cable Trunking is a fully enclosed cable tray, suitable for laying computer cables, communication cables, thermocouple cables and other control cables of highly sensitive systems. It has a good effect on shielding interference of control cables and protecting cables in heavy corrosion environments. Each cable tray type performs a different function and comes in various materials such as aluminum. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray., which can be customized according to customer needs.
