

High-density fiber optic end-face electric cleaning pen

AI Overview

Hot-selling high-density fiber optic cleaning pens provide one-click, alcohol-free cleaning for MPO/MTP connectors, ensuring stable optical performance and reducing insertion loss.

Key Features

- One-Click Cleaning:** Most high-density fiber optic pens, such as the CLE-MPO-T and A-M600 models, feature a one-click push design that allows quick, effective cleaning of endfaces without alcohol or chemicals, minimizing secondary contamination.
- Compatibility:** These pens are designed for MPO/MTP multi-fiber connectors, including 12, 16, and 24-fiber configurations, and work with both pinned and unpinned connectors.
- Cleaning Efficiency:** They remove dust, oil, and debris from fiber endfaces, achieving up to 99% cleaning effectiveness.
- Microfiber tapes or cleaning wires** automatically replace after each use to prevent secondary pollution.
- Durability:** Many models provide up to 500–600 cleanings per pen, making them cost-effective for high-density environments like data centers, telecom ODFs, and FTTH networks.
- Material and Safety:** Pens are made from anti-static resin, preventing electrostatic dust attraction and ensuring no additional contamination after cleaning.
- Ease of Use:** Slim, lightweight designs allow one-handed operation, reducing downtime and wear on connectors during maintenance.

Popular Hot-Selling Models

- CLE-MPO-T Fiber Optic Cleaner Pen:** Suitable for 12/16/24 fiber MPO/MTP connectors, alcohol-free, one-click operation, up to 500 cleanings, widely used in data centers and telecom networks.
- A-M600 MPO Fiber Optic End-Face Cleaning Pen:** Offers dry cleaning for MPO/MTP interfaces, transparent visualization for remaining capacity, over 600 cleanings, anti-static design.
- Fibershack 1.25mm LC Fiber Cleaner Pen:** Designed for LC connectors, single-click operation, comes with dust caps and protective case.
