

Home electrical distribution box assembly parts

Overview

A distribution box has several important parts. Each part does something special:

- Main Switch:** This switch controls all electricity coming into the box.
- Circuit Breakers (MCBs):** These protect each circuit. These components work together to prevent electrical faults, such.

A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. It ensures that electricity flows. Distribution boxes, also called distribution boards, are essential components in both residential and commercial electrical systems. We also highlight how reliable manufacturers like NUOMAK support stable, compliant, and cost-effective power distribution. The main parts are the Miniature Circuit Breaker (MCB), Residual Current Device (RCD), busbars, and the main switch.
