

How many meters of cable tray suspension is safe

Overview

To avoid the weight hanging or structural collapse, the weight should be supported in a balanced manner with the spacing of support normally 1. Rust is avoided by selecting the appropriate finish such as the Hot-Dip Galvanized in wet areas. Although BS 7671 touches on the subject of cable supports, it does not detail specifically what these support distances should be. 8 (Other Mechanical Stresses (A)) in that document provides requirements for cable support. In this blog, we'll focus on support spacing for perforated, ladder and wire mesh cable trays and reference the National Electrical Code (NEC). Cable trays are used for supporting. This guide covers the critical steps, from selecting the right electrical cable tray and performing accurate cable fill calculations to managing a safe cable pull through and ensuring all bonding and grounding requirements are met. es in the industrial environment.
