

How much does Canadian polymer cable tray cost

AI Overview

Canadian polymer cable trays, including PVC and fiberglass options, typically cost between CAD \$2 and \$50 per meter depending on material, size, and specifications.

Price Range

PVC Cable Trays: These are budget-friendly, lightweight, and corrosion-resistant, making them popular for residential, commercial, and industrial applications in Canada. While exact prices vary by brand and size, PVC trays are generally at the lower end of the spectrum, often around CAD \$2–\$15 per meter for standard sizes, with premium designs like Cablofil EZ Tray PVC or TechLine Mfg PVC offering enhanced durability and ease of installation.

Fiberglass/Composite Cable Trays: Fiberglass trays, such as Techline Composite or Enduro Composites, are more expensive due to their high strength, chemical resistance, and suitability for harsh environments. Prices typically range from CAD \$10–\$50 per meter, depending on specifications, load capacity, and environmental requirements.

Factors Affecting Cost

Material Type: PVC is cheaper than fiberglass or other composite polymers. Fiberglass offers superior durability and chemical resistance, which increases cost.

Tray Design: Ladder, perforated, or solid-bottom trays differ in price. Open designs like perforated trays may reduce material costs.

Size and Load Capacity: Wider or thicker trays designed for heavy cables cost more.

Installation and Accessories: Some trays include mounting hardware or modular components, which can affect overall cost.

Bulk Orders: Purchasing in larger quantities can reduce per-meter costs.

Comparison to Metal Trays

Polymer trays are generally more affordable than aluminum or stainless steel trays, which can range from CAD \$20–\$50 per meter for aluminum and higher for stainless steel. They are also lighter and easier to install, though they may not support extremely heavy loads like metal trays. In summary,...
