

How much does an auctioned optical fiber cable cost

AI Overview

Auctioned optical fiber cables typically range from \$0.09 to \$6 per foot, depending on fiber type, strand count, and construction. Typical Pricing The cost of fiber optic cables varies widely based on several factors:

- Fiber Type:** Single-mode fiber (OS2) generally costs \$0.09 to \$1.52 per foot, while multimode fiber (OM3/OM4) ranges from \$1.50 to \$6 per foot due to manufacturing complexity and performance requirements.
- Strand Count:** Higher strand counts increase costs. For example, a 12-strand cable may cost around \$0.50 per foot, whereas a 24-strand cable can reach \$1 per foot. Large backbone cables with 288 strands can cost \$6 per foot or more.
- Construction and Rating:** Armored cables for outdoor or harsh environments add 20-50% to the base cost. Indoor riser-rated cables are cheaper, while plenum-rated or flame-retardant cables are more expensive.
- Pre-Terminated Assemblies:** Factory-terminated cables with connectors cost more upfront but reduce installation labor, which can save overall project costs.

Auction Considerations When purchasing fiber optic cables at auction:

- Condition:** New, surplus, or used cables will affect price. Surplus or factory overstock may sell closer to wholesale rates.
- Bulk Discounts:** Auctions often sell in large lots, which can reduce the per-foot cost compared to retail. Wholesale bulk purchases can be as low as \$0.09 per foot for single-mode fiber.
- Additional Costs:** Shipping, handling, and potential testing or recertification for used cables may add to the total cost.

Example Estimates

- Small Lot** (1,000 ft, single-mode, indoor): \$90-\$500 depending on quality and auction conditions.
- Medium Lot** (2,000 ft, multimode, outdoor armored): \$3,000-\$12,000 depending on strand count and cable type.
- Large Lot** (5,000 ft, high-strand-count backbone cable): \$30,000-\$150,000, especially for premium or armored cables.

In summary, auctioned fiber optic cables can be signif...
