

How much does cable tray installation cost in the UAE

AI Overview

Cable tray installation for factories in the UAE typically ranges from AED 150 to AED 400 per meter, depending on material, size, and project complexity. Factors Affecting Price

Material Type: Galvanized iron (GI) trays are the most economical, while hot-dip galvanized (HDG) and stainless steel trays cost more due to superior corrosion resistance and industrial durability.

Tray Dimensions and Load Capacity: Wider, thicker, or heavy-duty ladder trays designed for industrial use increase both material and installation costs.

Coating and Finish: Powder-coated or corrosion-resistant finishes add to the price, especially for outdoor or harsh factory environments.

Project Complexity: Custom bends, supports, and connectors, as well as installation in high ceilings or congested areas, can increase labor costs.

Quantity and Lead Time: Bulk orders or standard sizes are often available ex-stock, while custom fabrication may take 5–10 working days, affecting overall project cost.

Installation Services Professional installation ensures proper alignment, secure mounting, and compliance with UAE safety standards. Services typically include:

- On-site measurements and shop drawings
- Load distribution and secure mounting
- Cable routing for power, data, and fiber optic systems
- Compliance with airflow and maintenance requirements

Cost Estimates

- Standard GI trays: AED 150–200 per meter including basic installation
- HDG or stainless steel trays: AED 250–400 per meter including installation
- Custom industrial setups: Prices may exceed AED 400 per meter depending on complexity, accessories, and factory-specific requirements

Suppliers and Contractors Leading UAE suppliers and installers include Metar, Hutaib Electricals, Ruwais Steel, Delta Cable Trays, and INSYNC International, all offering industrial-grade cable trays and professional installation services across the UAE. For accurat...
