

How much does it cost to customize fireproof cable trays in Fiji

AI Overview

Fireproof cable trays in Fiji typically cost between FJD 50 to FJD 200 per meter, depending on material, size, and customization.

Cost Factors

The price of a fireproof cable tray depends on several factors:

- Material:** Fireproof trays are usually made from galvanized steel, stainless steel, or aluminum, which are more expensive than standard PVC or mild steel trays.
- Type and Design:** Ladder-type or perforated trays designed for fire resistance may cost more due to additional coatings or fireproofing treatments.
- Size and Load Capacity:** Wider trays or those designed to carry heavier cables increase the cost.
- Customization:** Custom lengths, bends, or special fittings can add to the price.
- Supplier and Delivery:** Local suppliers like Brilltech Engineers and other cable tray manufacturers in Fiji offer competitive pricing, but shipping and installation may affect the final cost.

Typical Price Range

- Standard fireproof cable trays: FJD 50–100 per meter for smaller, lighter-duty trays.
- Heavy-duty or stainless steel fireproof trays: FJD 120–200 per meter, especially for industrial applications requiring high fire resistance.

How to Get Accurate Pricing

Since prices vary by supplier, material, and project requirements, it is recommended to:

- Contact local suppliers directly such as Brilltech Engineers or other certified cable tray manufacturers in Fiji.
- Provide specifications: length, width, load capacity, and fireproof rating.
- Request a formal quote including delivery and installation costs. By doing so, you can obtain a precise cost tailored to your project needs and ensure compliance with fire safety standards.
