

How much does stainless steel cable tray cost in North Africa

AI Overview

Stainless steel cable trays in North Africa typically range from \$50 to \$200 per meter, depending on grade, type, and load capacity. Overview Stainless steel cable trays are widely used in industrial, commercial, and corrosive environments due to their durability and resistance to corrosion. Common grades include 304 stainless steel, suitable for general environments, and 316 stainless steel, which offers higher resistance to harsh or coastal conditions. Types of trays include perforated trays, wire mesh trays, and ladder-style trays, each affecting the price and suitability for specific installations. Price Factors Material Grade: 316 stainless steel is more expensive than 304 due to its superior corrosion resistance. Tray Type: Wire mesh and perforated trays are generally less costly than heavy-duty ladder trays. Load Capacity and Size: Wider or thicker trays designed to carry heavier cables increase the cost. Supplier and Shipping: Prices vary depending on local availability, import duties, and delivery logistics in North African countries. Typical Price Range Light-duty stainless steel trays (304): \$50-\$80 per meter Medium-duty stainless steel trays (304/316): \$80-\$130 per meter Heavy-duty stainless steel trays (316): \$130-\$200 per meter These ranges are indicative and may fluctuate based on market conditions, supplier, and country-specific factors. For precise pricing, contacting local distributors or suppliers in North Africa is recommended, as they can provide quotes including shipping and installation options. Suppliers Several suppliers in Africa offer stainless steel cable trays suitable for North African projects, including Advanced Strut, which provides 304 and 316 stainless steel trays in various finishes and types. Online electrical suppliers also offer a range of cable management solutions, though prices may need to be confirmed for North African delivery.
