

How to add conduit to ceramic ferrules

AI Overview

Ceramic ferrules can be fitted with conduit using precision inserts and crimping or adhesive methods, with prices varying based on size, material, and customization.

Installation Process

1. **Select the Correct Ferrule and Conduit:** Choose a ceramic ferrule that matches the outer diameter (OD) and inner diameter (ID) requirements of your conduit. Custom zirconia ferrules are available with OD sizes from 0.60mm to 3.17mm and ID sizes from 80 microns to 1500 microns, with lengths from 2.5mm to 22.4mm . Ensure the conduit fits snugly inside the ferrule without excessive force.
2. **Prepare the Conductor or Tube:** Strip the conductor or prepare the tube to the correct length. The ferrule should cover the exposed section fully to ensure a secure connection . For ceramic tube inserts, the ferrule may also serve as a protective liner for high-temperature or corrosive applications .
3. **Insert the Conduit:** Gently insert the conduit into the ferrule. Depending on the application, this can be done using a press-fit, adhesive, or crimping method. For electrical applications, a gas-tight crimp ensures a durable connection, while for heat exchanger tubes, the ferrule may be bonded or mechanically secured .
4. **Secure the Connection:** If using adhesive, allow proper curing time. For crimped connections, ensure the crimp is uniform and does not damage the ceramic ferrule. Proper alignment is critical to prevent stress fractures in the ceramic material .

Pricing

Standard Ceramic Ferrules: Prices vary depending on size and material. Small standard ferrules may cost a few dollars each, while high-precision or custom ferrules can range from \$5 to \$50 per piece or more .

Custom Ferrules: For specialized applications, suppliers like Kientec Systems and Mingrui Ceramics provide quotes based on OD, ID, length, and tolerances. Lead times typically range from 7-20 days, and shipping costs depend on destination and quantity .

Conduit Fittings: Standard conduit fittings compatible with ferrules are available from suppliers like Ferrules Direct, with prices starting around...
