

How to create a skylight in a 24-core optical fiber cable

Overview

You take thin, flexible fiber optic strands (think fishing line that glows), thread them through tiny holes in a ceiling panel, and connect them to an LED light engine hidden above. The engine pushes light through each strand. It looks like a night sky, costs under \$75, and takes a weekend afternoon. Paint the ceiling dark, drill random holes, thread strands, leave a tiny bit poking out (not flush). This guide provides a step-by-step guide on creating a fiber optic starfield ceiling using fiber optic cables. Fiber optic star lights are a great way to add a touch of magic and sophistication to any room, and they're especially popular in theaters, planetariums, and other. I've always wanted a fiber optic, twinkling, magical STAR CEILING and I finally built one in my Space Closet project for my kids. The stars have a very natural twinkle & glow.
