

How to cut the angle of the cable tray

AI Overview

To cut a cable tray for an angled bend, use mitered cuts on two sections, each cut at half the desired angle, and ensure proper marking, cutting, and deburring for safety and precision.

Step-by-Step Guide for Angled Cuts

- 1. Determine the Angle:** For a 45-degree bend, each section of the cable tray should be cut at 22.5 degrees from a perpendicular line across the tray's width. This creates a mitered joint that forms the desired angle when joined.
- 2. Mark the Cut Line:** Use a measuring tape to measure the exact location of the cut. Draw a perpendicular line across the tray width. Use a protractor or angle finder to mark the 22.5-degree angle from the perpendicular line on each tray section. Ensure the second piece's cut is in the opposite direction to the first.
- 3. Select the Cutting Tool:**
 - Band saw:** Ideal for thin metal trays, providing clean cuts with minimal burrs.
 - Circular saw:** Suitable for light trays; cordless models with chip collectors improve safety and precision.
 - Angle grinder:** Offers flexibility but produces more sparks and requires careful handling with both hands.Avoid torches as they can damage the tray's surface and weaken the material.
- 4. Secure the Tray:** Clamp the tray firmly using clamps or a vise to prevent movement during cutting.
- 5. Execute the Cut:** Cut along the marked line carefully, maintaining a steady hand and following the angle precisely. Ensure the blade is appropriate for the tray material (metal or fiberglass).
- 6. Deburr and Smooth Edges:** After cutting, use a deburring tool or metal file to remove sharp edges. This prevents injury and protects cables from damage during installation.
- 7. Safety Precautions:** Always wear safety glasses, gloves, and hearing protection. Kevlar gloves are recommended for handling cut edges, and ensure the surrounding area is protected from sparks if using grinders.

Tips for Accuracy and Efficiency

- Double-check measurements before cutting.
- Use cutting oil for thicker trays to prolong blade life and reduce heat.
- For complex bends, consider creating a template to ensure consistent angles across multiple sections.

cable tray and trunking for electricians (Page 1) / Help Me ! / Math Is ...

By applying the following formula you can quickly find the size of cut out section that you need to cut out of the side of the cable tray, or gutter-type section to make that angle.

CUTTING GUIDELINE

Hilti's cordless bandsaw is an appropriate tool for cutting low height, thin metal products such as cable ladders and trays and support channels. Accurate cutting is achieved with low noise and debris.

How to cut Channels, Cable Ladders and Cable Trays

How to cut Channels, Cable Ladders and Cable Trays In the Oglaend System Cutting Guideline you can easily find out what the optimal

Flexible horizontal adjustable splice plate instructions

Field cut the cable tray/ladder based on the desired angle to be made to fit with the installation. Mark a line on the cable tray/ladder where the cutting will occur.

7 Best Cable Raceway Systems for Neat Cable

Including sixteen reusable cable ties means you get fully equipped for any wire management task right out of the box. That all-in-one convenience is

Make a (45-45) 90 Gusset Bend in Electrical Cable Tray In One Piece

How to make a 90 electrical cable tray bend to measurement with a gusset of your choice using one piece of tray. Great if you are new or just forgot how to do it, this easy to follow guide...

how can i cut a cable tray for 45 degree bend?

To cut a cable tray for a 45-degree bend, you need to make two 22.5° cuts on two separate pieces of cable tray. Each cut should be 22.5° from a perpendicular line drawn across the tray's width.

Trunking Cutting Techniques Guide | PDF

The document provides instructions for forming various bends and joints in electrical trunking and cable trays. It describes: 1) How to mark and cut a right-angle

Document DICOS

Eventually, it will be necessary to field cut the cable tray because the length of the cable tray required will be less than Standard length. If there are many cuts to be made in a given area, waste can be

AEONS Premium Monitor Laptop Mount & Under Desk Cable Management Tray ...
