An electrical riser diagram (also known as a single-line or one-line diagram) is a schematic illustration that shows the vertical and horizontal distribution of electrical power in a building. Unlike a floor plan, it is not drawn to scale. It shows how electricity enters the facility and is stepped down and distributed to various floors and loads. Single Phase Distribution Box generally consists of Double Pole MCBs, Single Pole MCBs, and RCCBs. An electrical riser diagram provides a vertical representation of the electrical system, showing the path of conductors from the service equipment up to the weatherhead.
