

Light Distribution Box

Overview

The lighting distribution box is a critical component in modern electrical systems, designed to manage and distribute electrical power to lighting fixtures efficiently and safely. Every product in our vast range is carefully designed to ensure that it provides the best experience for the user. Its main functions include protecting the lighting circuits from electrical faults, managing voltage levels, and. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. The. Through-wiring within the luminaire is not possible for certain luminaires or connecting pillars. In this case, we recommend BEGA distribution boxes for installation in soil. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS.
