

Low-noise fiber stripping pliers RoHS compliant

Overview

Stripping pliers with 3 holes for stripping and stripping optical fiber sheaths with a diameter of 125um / 2-3mm. Compatible with 9/125um single-mode, 50/125um and 62. Set screw and allen key. The carbon footprint (PCF) indicates how much CO₂ is generated during the manufacture of the pliers. The PCF is calculated using the cradle-to-gate approach, which considers the life cycle of the pliers from raw material extraction to leaving our factory, with a focus on the manufacturing phase. High-quality, wear-resistant stripping blades and glass fibre reinforced plastic ensure long-lasting performance – for thousands of stripping cycles without compromise. Find your closest global distributor. 02 - 10 mm 2, self-adjusting, stripping length of up to 18 mm, cutting capacity of up to 10 mm 2 stranded/1.
