

Network Rack Cold Aisle Low Loss Manufacturers

AI Overview

Leading manufacturers of cold aisle containment systems include AZE Systems, Legrand, Secure I.T. Environments, Subzero Engineering, and Modular Rack Systems (MRS), offering energy-efficient, customizable solutions for data centers. Key Manufacturers and Solutions

AZE Systems provides modular hot and cold aisle containment solutions, including ceilings, walls, and end-of-row doors. Their systems are designed to maintain optimal operating temperatures, reduce energy costs, and can be customized to fit various rack sizes and layouts. Legrand offers the Contain-IT FLEX system, which creates enclosed cold aisles to ensure cool air reaches server inlets efficiently. Their solutions are modular, scalable, and can be pre-fabricated for faster on-site assembly. Legrand also provides seismic-rated and engineered cabinet solutions for enhanced reliability. Secure I.T. Environments delivers both partial and fully bespoke cold aisle containment systems. Their solutions are independent of cabinet manufacturers and can accommodate varying rack heights, widths, and depths. They also offer thermal curtain options for budget-conscious projects. Subzero Engineering specializes in cold aisle containment systems that isolate cooled supply air directly to IT equipment intakes. Their modular designs include sliding doors, ceiling panels, and retractable roof systems, which improve energy efficiency, reduce hotspots, and lower operational costs. Modular Rack Systems (MRS) focuses on high-quality, customizable cold aisle containment solutions made from aluminum and steel. Their systems include top panels, swing or sliding doors, and are designed to maximize cooling efficiency, reduce energy consumption, and extend equipment lifespan.

Benefits of Cold Aisle Containment

ChilledDoor®, Rear Door Heat Exchanger | Data Center

Motivair's ChilledDoor Rack Cooling System is an active rear door heat exchanger capable of removing server densities up to 75kW per rack and 100% heat removal.

Cold Aisle Containment | Legrand

By maintaining consistent, predictable temperatures, cold aisle containment minimizes thermal stress and reduces the risk of overheating, improving reliability and extending equipment lifespans.

Hot & Cold Aisle Containment Systems For Data

Cool Shield™ products provide customers with versatile, turnkey aisle containment systems for new or existing critical spaces. Our offerings range from a single row

Cold Aisle Containment

Modular designed frame made of cold roll steel, with thickness $\geq 1.2\text{mm}$ to ensure the firmness and security. Each modular unit has proper space for cable

Hot Aisle Containment vs. Cold Aisle Containment:

Implementation of both hot and cold aisle containment does not reduce the volumetric flow rate of bypass airflow in a computer room. When cold

Hot and Cold Aisle | Effective Aisle Containment
