

New Standards for Distribution Boxes in 2025

Overview

The November 2025 releases— EN 415-7:2025 for packaging machine safety and ISO/TS 31514:2025 for food traceability in cold chain logistics—represent key milestones. The packaging and distribution of goods sector has made significant advancements in November 2025 with the publication of two cornerstone international standards. Four core publications emerged during this month: two closely aligned standards on packaging. And at a time that would be most appropriate to look into the future and plan towards 2025, market competition in the Distribution Boxes global market is relevant for both the manufacturer and consumer. Distribution box is the heart of an electrical distribution system. Adopted on 11 February 2025, and applying from 12 August 2026, the PPWR replaces the Packaging and Packaging Waste Directive 94/62/EC (PPWD).
