

Optical module 9dB

Overview

The 9db PON module is a fiber optic transceiver designed for GPON systems, enabling reliable 20km data transmission with 9db power handling. It ensures signal stability, supports 1. 25G/10G speeds, and is compatible with SFP+ interfaces. The following tables list the performance specifications for the various functional blocks of the integrated optical transceiver module. The transmitter input and receiver output impedance is 100 Ohms differential. Its plug-and-play design and high compatibility make it ideal for. OLT series include EPON/GPON/10G EPON/XG-PON/XGS-PON OLT in a compact box design to provide efficient and stable support for your network connectivity! ONU/ONT can help you easily implement a FTTx network to provide a seamless, high-speed Internet experience for your home or office.
