

Papua New Guinea Optical Amplifier QSFP

Overview

This QSFP-DD dual pluggable EDFA booster amplifier offers a optical input range and provides a +20dB nominal gain to a C-Band DWDM link. It is configured for Automatic Gain Control (AGC) by default and can be further. The 400G QSFP-DD ZR is deigned to 400G 120Km DCI DWDM applications without inline chromatic dispersion compensation. responsively coherent receivers to deliver high performance at 400G DP-16QAM modulation formats. The wide variety of modules gives you flexible and cost-effective options for all types of interfaces. Cisco offers a range of GBIC, SFP, XFP, SFP+, CXP, CFP, Cisco CPAK, and QSFP+ pluggable. This article will introduce the next generation optical module in detail, QSFP-DD, also known as quad small factor pluggable, and this article will also introduce the difference between QSFP-DD optical module and other 400G form factor modules.
