

PoE switch with hard drive

AI Overview

Some modern PoE switches, like the Exaviz Cruiser Carrier Board and Waveshare PoE M.2 HAT+, combine Power-over-Ethernet functionality with support for SATA and NVMe storage, enabling networked storage and device power over a single Ethernet connection.

Overview of PoE Switches A PoE (Power-over-Ethernet) switch is a network switch that delivers both data and electrical power over standard Ethernet cables to connected devices such as IP cameras, Wi-Fi access points, and VoIP phones. This eliminates the need for separate power cables, simplifying installation and reducing clutter in network setups. PoE switches come in various port counts and power standards, including PoE, PoE+, and 4PPoE, depending on the power requirements of connected devices.

PoE Switches with Storage Capabilities Some advanced PoE solutions integrate hard drive support, allowing the switch to function as a small NAS or storage hub:

- Exaviz Cruiser Carrier Board:** Designed for the Raspberry Pi Compute Module 5, this board features up to 16 gigabit PoE ports, a 2.5-gigabit uplink, and storage options including two SATA III ports (supporting RAID 0, RAID 1, span, and JBOD) and an M.2 NVMe slot for high-speed storage. It also includes USB ports, dual HDMI outputs, and wireless connectivity via an ESP32-C6 coprocessor.
- Waveshare PoE M.2 HAT+:** This expansion board for Raspberry Pi 5 combines PoE and PCIe-to-M.2 conversion, supporting M.2 NVMe SSDs in 2230 and 2242 sizes. It allows the Raspberry Pi to boot from the SSD and provides a compact solution for networked storage with PoE power delivery.

Applications PoE switches with integrated storage are ideal for:

- Home or small office NAS setups where devices like Raspberry Pi can act as a server.
- IP camera networks that require local storage for video footage.
- IoT and edge computing applications where compact, powered devices need both network connectivity and storage.

Key Considerations When selecting a PoE switch with hard drive support:

- Power budget:** Ensure the switch can supply sufficient power to all co...
