

Price List of Armored Fiber Optic Cable Patch Cords

AI Overview

Armored fiber optic patch cords typically range from \$10 to \$50 per meter depending on fiber type, connector type, and customization options.

Overview Armored fiber optic patch cords are designed with metallic or aluminum armor and Kevlar reinforcement to protect the optical fibers from physical damage, rodent attacks, and harsh environmental conditions, while maintaining flexibility and stable signal transmission. They are suitable for indoor/outdoor, industrial, and data center applications.

Typical Pricing

- Singlemode (OS2, 9/125) armored patch cords: Approximately \$15–\$40 per meter, depending on connector type (LC, SC, FC, ST, or APC variants) and length.
- Multimode (OM3/OM4, 50/125 or 62.5/125) armored patch cords: Around \$10–\$30 per meter, with LC, SC, or ST connectors.
- Specialized tactical or military-grade armored cables: Prices can be higher, often \$30–\$50 per meter, due to enhanced tensile strength, bending resistance, and environmental protection.

Connector and Core Options

Connectors: LC, SC, ST, FC, MU, E2000, and APC variants (LC/APC, SC/APC, etc.).

Fiber cores: 2, 4, 6, 8, 12, or 24 cores depending on application.

Lengths: Standard lengths range from 1 meter to 50 meters, with custom lengths available on request.

Additional Considerations

Lead time: Sample orders typically ship in 3–5 days; bulk orders may take 1–2 weeks, and OEM/custom orders 2–4 weeks.

Shipping: Options include DHL, UPS, FedEx, TNT, airline, or sea freight.

Durability: Armored patch cords are rodent-resistant, crush-resistant, and maintain low insertion loss and high return loss.

Customization: Many suppliers offer custom lengths, fiber types, and connector combinations to meet specific network requirements. For exact pricing, it is recommended to contact suppliers directly with your required fiber type, connector type, and length, as prices vary based on specifications and order volume.
