

Price List of Electrical Distribution Boxes for Construction Sites in Mexico with Images

AI Overview

Electrical distribution boxes for construction sites in Mexico range from approximately \$50 to \$500 USD depending on size, material, amperage, and features, with options available in IP65–IP67 ratings.

Overview of Construction Site Distribution Boxes

Construction site distribution boxes are designed to safely distribute electricity to temporary installations, tools, and machinery. They are typically made from thermoplastic, fiberglass, or metal, and often feature pre-wired configurations for quick deployment. Key features include:

- IP Ratings:** IP65 (dust and water-resistant) to IP67 (fully waterproof) for outdoor use.
- Amperage Capacity:** Commonly 32A to 63A for standard construction applications.
- Material:** Technopolymer, fiberglass, or sheet steel with powder coating for durability.
- Safety Standards:** CE and RoHS certifications ensure compliance with international safety and environmental standards.
- Customization:** Sizes, colors, fittings, and socket configurations can be tailored to project needs.

Price Range in Mexico

Based on current listings and manufacturer data:

- Small single-phase boxes (32A–40A):** Approximately \$50–\$120 USD, suitable for light-duty construction or temporary outdoor events.
- Medium three-phase boxes (50A–63A):** Approximately \$150–\$300 USD, ideal for standard construction sites with multiple circuits.
- Large industrial or modular units:** Up to \$500 USD or more, often with advanced features like surge protection, multiple sockets, and smart monitoring capabilities.
