

Price List of Electrical Distribution Boxes for Paraguayan Construction Sites

AI Overview

Electrical distribution boxes for construction sites in Paraguay typically range from USD 50 to USD 500 depending on size, material, and specifications. Local Supplier Pricing In Paraguay, suppliers like Construx Paraguay and Brasguay offer a variety of electrical boxes for residential, commercial, and industrial projects. Prices vary based on:

- Material: Thermoplastic, fiberglass, or sheet steel enclosures
- Size and capacity: Single-phase or three-phase distribution, number of circuits
- Protection rating: IP65, IP67, or IK08 impact resistance for outdoor or harsh environments
- Pre-wired vs. empty boxes: Pre-wired units cost more due to labor and components

For standard construction site enclosures, small thermoplastic boxes may start around USD 50-100, while larger steel or fiberglass enclosures with higher protection ratings can reach USD 300-500.

Import Trends Affecting Prices According to import data from Volza, Paraguay imported 572 shipments of electrical distribution boxes between March 2024 and February 2025, sourced mainly from Brazil, Belgium, and Japan. Import costs, shipping, and customs duties can influence local pricing, especially for specialized or high-capacity boxes.

Factors Influencing Cost on Construction Sites

- Project scale: Larger construction sites require multiple distribution boxes, increasing total cost
- Voltage and amperage requirements: Higher-rated boxes for medium-voltage or three-phase systems are more expensive
- Installation complexity: Pre-wired or modular units reduce labor but increase upfront cost
- Compliance with standards: Boxes meeting IEC 61439 or IEC 60364 standards may carry a premium

Practical Advice For budgeting purposes, a medium-sized construction site in Paraguay can expect to spend USD 150-300 per distribution box for standard three-phase enclosures with adequate protection. For high-end or specialized enclosures,...
